SHOP NOW    FAQ  
CONTACT

"I'm using the 25' Hydrotech expandable hose on my deck and it's perfect for my plants. It's super light and so easy to move around, the connector fits tight to the spigot with no leaking and has a brass valve to turn it off or slow the water flow. It's light yet still feels heavy duty."

— Laurel

"Great garden hose, perfect length and weight. It is light and very easy to handle. Made of great material and very durable. I really like that it is expandable, it gives me so much convenience. I use it in my backyard daily and I am totally in love about it."

— Aria

#### OPERATION INSTRUCTIONS BEFORE FIRST USE

Stretch your hose to its specified length  
and hold it in place for 1-minute.

Taking this initial action encourages  
the reinforced latex tube to  
create expansion memory.

The HydroTech 100 ft. Expandable Burst Proof Garden Water Hose can be easily transported anywhere you work. It's the only hose you'll ever need - lightweight yet durable, flexible, and flowing with optimal water pressure at all times.

- Includes a heavy-duty brass valve with flow-control shut-off
- Patent-pending force control technology protects the hose from bursting
- The tough Nylon connector resists rust and creates a tight seal to the spigot
- A thick latex liner provides an added layer of protection to the webbing, avoiding tears and rips at the connection point
- The Strain Relief Guard creates support from the connector to the hose, extending bend radius and stability
- Mold and mildew resistant material
